

BODIES OF KNOWLEDGE

VISITOR GUIDE

Bodies of Knowledge is a multi-site art exhibition that explores the many roles that the human body takes in shaping and creating knowledge.

Knowledge begins in an encounter with the senses. Every printed or spoken word enters through the soft passageway of the eyes, ears, or fingertips traveling along a stringy network of nerves to the brain. Often we experience pleasure, revulsion, or memory through taste and smell. We know about weight and movement through our muscles; they resist or submit to gravity. We feel the complexities of human contact and interaction. In this exhibition we explore several themes related to body knowledge: Movement and Sensation; Decoration, Ritual, and Costume; The Social Body; The Body in Transformation; and Extending the Body.
